

Three Priority Safety Areas

Page 1 of 2 - quick numbers for email review

2021-2025 crash records

1. Shelburne cut-through

Crash burden is higher on the residential cut-through section closer to Warrensville, Courtland, and North Park.

40

to Warrensville crashes

16

injured on that section

16 / 8

crashes / injured after Warrensville

Use this as the clearest comparison: Shelburne to Warrensville has 40 crashes / 16 injured, while Shelburne after Warrensville to Green has 16 crashes / 8 injured.

2. Fairmount Circle / Fairmount Blvd

High-crash everyday destination area near CVS, food, Fairmount Circle, and future Trader Joe's.

74 / 16

Circle area crashes / injured

55 / 26

Fairmount + Warrensville

160 / 53

Fairmount corridor total

This is not only a traffic location. It is an errand and family destination area where walking and biking should be practical.

3. Shaker / Warrensville by school + library

Major crossing area next to Shaker Middle, Bertram Woods Library, University School, transit, and fields.

61 / 25

Warrensville + Shaker

113 / 44

school/library corridor

0

Chesterton comparison crashes

This area is a school, library, transit, and field access concern, not just an arterial traffic issue.

Specific ask: Who is the right staff person, committee, or process to review these three areas as a corridor safety / traffic-calming issue?

Three Priority Safety Areas

Page 2 of 2 - larger map views

2021-2025 crash records

1. Shelburne cut-through

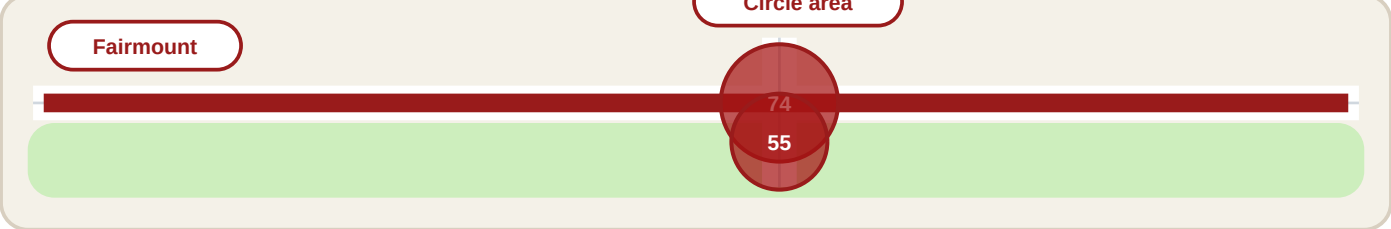

The comparison is visible along Shelburne: 40 crashes / 16 injured before Warrensville, compared with 16 crashes / 8 injured after Warrensville.

Priority point: the residential cut-through section carries the higher crash burden.

2. Fairmount Circle / Fairmount Blvd

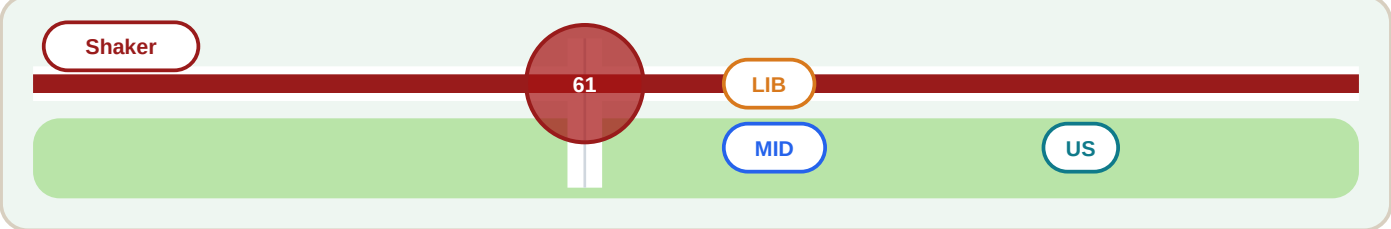

Fairmount Circle, Fairmount + Warrensville, and the Fairmount corridor show high crash and injury totals around everyday destinations.

Priority point: this is a family errand area, not only a driver route.

3. Shaker / Warrensville by school + library

The school/library corridor is where Shaker Middle, Bertram Woods Library, University School, transit, and fields overlap with high crash totals.

Priority point: kids and families need safer crossings through this school/library access area.

Specific ask: Who is the right staff person, committee, or process to review these three areas as a corridor safety / traffic-calming issue?
